

### New safety feature

Crash Detection that calls for help when your customer can't. iPhone 14 can detect a serious car crash, then call 999 and notify their emergency contacts

### Better power management

Awesome all-day battery life on iPhone 14.

### Highest quality video

Cinematic mode automatically shifts focus to the most important subject in a scene, just like filmmakers do. And now your customer can record in 4K at 24 fps — the same frame rate they use in the movies.

### Stunning display

OLED technology delivers incredible contrast for bright whites and true blacks. High resolution and colour accuracy make everything look sharp and true to life. True Tone makes your customers' display easier on their eyes by adjusting to the ambient light.

### Improved Camera

A new Main camera and improved image processing let your customers capture even more sensational shots in all kinds of light — especially low light. They can snap their sharpest, most colourful close-ups and group shots, thanks to a new TrueDepth front camera with autofocus and a larger aperture.

### Better performance

A15 Bionic, with a 5-core GPU, powers all the latest features and makes graphically intense games and AR apps feel ultra fluid.
